Traffic Control

County CV will be closed to through traffic during this project, but homeowners, customers, and emergency services will still have access to all homes and businesses. Message boards will be used to give advance notice of closures/detours. For the safety of our crews, residents are encouraged to slow down and be alert when using an active construction zone to access their driveways. Identify alternate routes so the closures will be less disruptive. Avoid the active construction zone during the work day if possible.
