Subject: Important Announcement – End of Water Fluoridation

Dear Residents of the Village of DeForest,

We are writing to inform you of an upcoming change to the Village of DeForest's public water supply. Effective March 7, 2025 the Village will discontinue the addition of fluoride to the municipal water system. This decision was made following careful consideration of community feedback, regulatory guidelines, and an evaluation of the long-term impacts on our water infrastructure.

We encourage individuals who wish to continue receiving fluoride benefits to consult with their dental care providers for alternative options, such as fluoride toothpaste and treatments.

Please be assured that this change does not impact the safety or quality of our water supply. The Village of DeForest remains committed to delivering clean, high-quality drinking water that meets or exceeds all state and federal standards.

We understand that this decision may raise questions, and we welcome your input. If you would like more information or have any concerns, please contact the Village of DeForest Waterworks 608-846-6751 or blauj@deforestwi.gov.

Sincerely,

A handwritten signature in cursive script that reads "Judd Blau".
